# INTERNSHIP COMPLETION LETTER

Date: 26-12-2025

To Whom It May Concern,

This is to certify that **Aishraj Bamoriya** has successfully completed their **Full Stack Developer internship** at Sheryians Coding School, Bhopal.

The internship was undertaken from **10-Sep-2025 to 10-Dec-2025**, during which the student demonstrated dedication, creativity, and a willingness to learn. Throughout the internship, he contributed by working on an AI-based resume interview and assessment system, implementing resume upload handling, frontend parsing, backend-driven interview question generation, dynamic question rendering, and structured answer submission, along with a scalable and reusable test and questioning interface that incorporated anti-cheating mechanisms such as copy–paste prevention and real-time AI-based evaluation with result display. This also included work on an admin-driven AI test creation and candidate assessment module, enabling prompt-based test generation, secure email-based invitations, enrollment validation, and backend evaluation of results. In addition to the AI-focused work, involvement extended to a comprehensive job application management system that allowed users to apply for jobs while administrators could post job listings, filter applicants, and update hiring statuses using MongoDB aggregation pipelines. Responsibilities covered both backend and frontend features, including responsive client-side functionality such as dynamic skill management that enabled administrators to add, update, and delete skills, with TanStack Query used to ensure optimized data fetching and fast UI updates. Collaboration took place within an Agile development environment using GitHub for version control (branching, merging, and pull requests), Slack for team communication, and ClickUp for sprint planning and task management.

We appreciate the efforts and enthusiasm shown by **Aishraj Bamoriya** during the internship period and wish him great success in all future endeavours.

Authorized Signatory

Dhanesh Malviya
